Attachments: MB25 DUMP_till-30112025.XLSX; RE: Clarification Required on open aged Reservations

Dear Aman Ji,

As per the clarification email below, this is to inform you that we have closed all open reservations in SAP up to 31-Oct-2025. The SAP download dump is attached for your reference.

Additionally, we have initiated a monthly reconciliation mechanism to prevent the accumulation of outdated reservations.

Attached is the Store and IT email communication for your reference.

Thanks & Regards!

Subject: RE: Clarification Required on open aged Reservations

Dear Aman,

Thank you for sharing the observations listed below. We have discussed all the points internally with our team and will address and resolve them as soon as possible. Please find our highlighted clarifications and the corresponding corrective actions taken in response to your observations.

1. **Periodic Reconciliation of Open Reservations**
   We acknowledge that a formal process for periodic review and closure of open reservations is currently not in place. We will work with the concerned departments to establish a structured reconciliation mechanism on a monthly basis to avoid the accumulation of outdated reservations.

2. **Aged Open Reservations – MvT 201, 301 & 311 (>365 Days)**
   Noted. We have initiated a detailed review of the aged reservations listed in Sheet A. The respective users/owners will be consulted to verify the requirement, and the reservations will be systematically closed or cancelled where they are no longer valid. The cleanup activity will be completed within a defined timeline.

3. **Non-Blocking of Inventory Against Reservations**
   We understand the concern regarding system non-blocking of reserved stock. This will be discussed internally with the planning and SAP support teams to assess the feasibility of enabling appropriate controls or alternative solutions to ensure alignment between reserved and available stock.

4. **Missing Storage Location in Reservations**
   The issue of reservations without Storage Location (as highlighted in Sheet B) is acknowledged. We will review these cases and coordinate with the originators to update the correct Sloc wherever applicable. Necessary communication will also be issued to ensure that all future reservations are created with mandatory storage location details.

Thanks
Roshan

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Pabitra / Roshan Ji,

As discussed, we have reviewed the open reservations (MB25 extract as on 14-Nov-2025) and identified a few exceptions that require your clarification and corrective action. The key observations are as follows:

1. **No Process for Periodic Reconciliation of Open Reservations:** There is currently no defined mechanism to periodically review, validate, or close open reservations, resulting in outdated and inaccurate reservation records.

2. **Aged Open Reservations – MvT 201, 301 & 311 (>365 Days):** A total of 4,197 unique reservations under Movement Types 201 (Goods Issue for Cost Center), 301 (Transfer from Plant to Plant), and 311 (Transfer within Plant) have remained open for over a year. These should ideally be closed upon execution or cancelled if no longer required. *Please refer to Sheet A in the attached workbook for details.*

3. **No Actual Blocking of Inventory Against Reservations:** We noted that reserved quantities are not system-blocked, which may result in a mismatch between reserved stock and available-to-use stock. This may lead to an inability to honor reservations when required, potentially disrupting production or departmental consumption.

4. **Missing Storage Location (Sloc) in Reservations:** 2887 unique open reservations do not contain a Storage Location, which is essential for accurate posting and effective stock tracking. Absence of Sloc may result in errors during goods issue and increase the likelihood of misposting or consumption from incorrect locations. *Refer Sheet B in the attached workbook.*

We request your inputs on the above observations.

Thanks & Regards,
